

pro-manchester

Health Tech Conference

Sponsorship Opportunities
Friday 9th December 2022

ABOUT THE EVENT

Innovation in Healthcare is crucial in order to meet changing demands and deliver better outcomes for patients. Manchester is home to world-leading research and development assets as well as the largest clinical academic campus in Europe and continues to be at the forefront of innovative healthcare treatments.

Our HealthTech Conference is now in its 3rd year and has established itself as an essential, must attend event in the Healthcare calendar. We will explore what new and innovative ideas have been developed in the past 12 months and what kind of a difference are they going to make to the future of healthcare delivery in the UK. We will be looking at the changes in legislation, operating methods and culture and how all these things are driving a fundamental shift in our healthcare system for good.
